

Cruise control, function (schematic presentation)

Decreasing set speed

Switch set to ON.

The cruise control unit will regulate the throttle opening.

If the SET button is held pressed towards the DEC position for more than 0.5 s, the speed will slowly decrease until the SET button is released.

If the SET button is kept pressed towards the DEC position for less than 0.5 seconds, speed will reduce by 1.6 km/h (1 mph).

Throttle opening reduced when the valve in 6/24 is active.
