

Cruise control, function (schematic presentation)

Increasing set speed

Switch set to ON.

Cruise control unit regulates throttle setting.

If the SET button is held pressed towards the ACC position for more than 0.5 s, the speed will increase slowly until the SET button is released.

If the SET button is held pressed towards the ACC position for less than 0.5 s, the speed will increase by 1.6 km/h (1 mph).

Acceleration increases when the motor in 6/24 is activated.
